

1. What features of intellectual property make it more difficult to protect than physical property?
2. What paradoxes arise when we attempt to extend Lock's notion of a natural right to property into the realm of intellectual property?
3. When referring to copyrighted materials, what is meant by the term "fair use"?
4. What are the ways in which individuals or firms in the United States may protect their intellectual property?

5. What is a relative disadvantage of patents vs. trade secrets?
6. What are the four factors to consider in describing whether a use of copyrighted material is a fair use?
7. Suppose you want to develop a program that duplicates the functionality of a program created by someone else. Describe how you may do this without violating the copyrights held by the person who created the original software.
8. List three of the benefits of free software.
9. List one weakness of free software.

10. Give an example in which plagiarism is a copyright infringement, and give an example in which it is not.

11. Give two examples of how DRM technologies control the use of intellectual property.
