

# Magic Item Creator

Ian Kaiserman, Ian Burgess, Neriah Graham, Evan Rohde

# PDF Rendering

- Solid template designed
- Wraps large text blocks automatically
- Image scales consistently regardless of size
- Need to implement Magic Item object next

Current template (with example garbage text)

## Tying together project elements

- Piecing together “sandboxed” project parts
- Tie UI elements to various functions created
- Implement the magic item object into the program parts that need it
