

CSCD 211

Lab 1

PROGRAM SPECIFICATIONS

This is a warm up assignment based on what you should have learned in CSCD 210. We will spend a day or two in class reviewing. You are required to use my jar file. If you write the utils sent of classes, you will receive 0 points for this lab.

A documented API is provided. Start now and ask questions. If you really struggle with this lab I would suggest you think about repeating CSCD 210.

INPUT FILE SPECIFICATIONS

The input files will each have at least one entry. Each player type is specified as a CSV file, there is more data in the file then we will currently need so you will have to figure out how to read the data. I have attached some input files.

TO TURN IN

A **zip** file that contains Lab1 (not Lab1 inside another folder or renamed) folder and all the code. Your Lab1 folder will not have an src or bin folder. If they do you have set up eclipse wrong. If we can't compile your code and run your code from the command line then you will receive 0 points. This is CSCD 211 there is no excuse for submitting code that does not compile and run. There will be no resubmission after the due date. You get your code in on time and at least partially working always.

Name your zip your last name first letter of your first name lab1.zip (Example: steinerslab1.zip)

Get started ASAP!
