For your review:

- Chapter One Questions
  - Elements of the information technology, such as the alphabet and the abacus, are more than 2,000 years old. What about the present era distinguishes it as the Information Age?

  - In what way did the Cold War help bring about the personal computer?

  - In what important ways did the hypertext system of Bernes-Lee differ from earlier hypertext systems?

  - Give two examples from this chapter of how a social condition influenced the development of a new informational technology.

  - Two examples of social change brought about by the adoption of new information technology:

- o Being your Best Self
  - Moral Awareness
    - ethical fading
    - moral myopia

  - Moral Decision Making
    - self-serving bias
    - deontologist
    - consequentialist
  - Moral Intent
    - Most common rationalization categories
  - Moral Action
    - moral ownership

    - moral efficacy

    - moral courage

    - Rationalizations

- Chapter Two Questions

    - Define in your own words what "the ethical point of view" means.

    - What is the difference between morality and ethics?

    - What is the difference between ethical relativism and ethical objectivism?

    - What do we mean when we say an ethical theory is rational?

    - Describe similarities and differences between act utilitarianism and rule utilitarianism.

- What is plagiarism? Describe four different ways that a person can commit plagiarism.

- Describe similarities and differences between Kantianism and social contract theory.
